## **Bedroom Diagram**

Name: Period:

Think about where you sleep. What would happen if there was an earthquake while you were sleeping? Would there be stuff falling on your head? Are your shoes nearby so you don't step on broken glass? In the space below, draw the room where you sleep as it would appear to a spider on the ceiling. In other words, make a map or floorplan of where you sleep. Be sure to include any doors or windows.
