## Brainpop—Asexual Reproduction Storyboard

After watching the Brainpop on asexual reproduction, think about the examples you saw. In the boxes below, make drawings to show what happens when these different organisms reproduce asexually.

Name:

Period:

strawberries (can reproduce asexually by <b>propagation</b> , making <b>runners</b> )		
at the start	while it is happening	when it is done
yeast (reproduces asexually by <b>budding</b> )		
at the start	while it is happening	when it is done
starfish (can reproduce asexually through <b>regeneration</b> )		
at the start	while it is happening	when it is done
