

Earth and Life History
Brainpop—Rock Cycle

Name:
Period:

Watch the Brainpop on the rock cycle, then fill out the chart below using descriptions from the word bank. Some boxes have more than one description in them; these boxes have two dots to remind you of this. Then fill out the chart on the back of this page. You can also check your textbook in Chapter 8, Section 2 for help.

*caused by plate movement changed by heat and pressure deep underground inside Earth
layers of particles get cemented together underwater molten rock cools and hardens on the surface on the surface*

types of rocks

where they are formed

how they are formed

igneous

-
-

sedimentary

metamorphic
